

KAFD PIF TOWER FIT-OUT PROJECT

2023 WORLD SAFETY DAY CELEBRATION

May 04, 2023

Introduction

The World Day for Safety and Health at Work, also known as Occupational Health and Safety Day, is held annually on April 28 to promote the prevention of workplace accidents and diseases around the world. It is an awareness-raising campaign intended to focus international attention on emerging trends in the field of occupational safety and health, as well as the magnitude of work-related injuries, diseases and fatalities globally.

The theme for the 2023 World Day for Safety and Health at Work is "A safe and healthy working environment is a fundamental principle and right at work."

It is the responsibility of all key stakeholders to foster a preventative safety and health culture in order to fulfill their obligations and responsibilities for preventing workplace deaths, injuries, and diseases and allowing workers to return home safely at the end of the working day.

On May 4, 2023, PIF Project commemorated World Safety Day with a series of events and activities, which are summarized in the following slides.
